+91 6350435068 | business.nishant777@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Backend Software Engineer shipping production APIs, AI pipelines, and cloud infrastructure end-to-end

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, SQL

Backend: Node.js, Express.js, Spring Boot, RESTful API Design

Databases: PostgreSQL, MySQL, Prisma ORM, MongoDB

Cloud & DevOps: AWS (EC2, RDS), Docker, GitHub Actions CI/CD, Nginx, WSL

Frontend: Next.js, React.js, HTML/CSS, Shadcn, Ejs

EXPERIENCE

Full Stack Developer Intern | Zytexa Technology LLP, Jaipur

July 2026 – Present

TypeScript, Node.js, Express, PostgreSQL, Prisma, React.js

- Building the backend of **CivilCheck**, a three-sided property-verification marketplace — 12 **Prisma/PostgreSQL** models with role-isolated **JWT auth** (buyer / seller / admin) that makes cross-role token reuse structurally impossible.
- Engineering the marketplace's money logic, seller earnings and settlement APIs, an admin refund workflow, and commission splits are frozen at purchase time so historical records stay correct even as policy changes.

Software Engineer Intern | Pratham Softwares, Jaipur

March 2026 – June 2026

Java, Spring Boot, MySQL, React.js, TypeScript

- Built an employee-appraisal platform end-to-end, a layered **Spring Boot** backend on MySQL, with DTO-isolated API contracts and global exception handling.
- Secured every route with **Spring Security 6** + **JWT** role-based access for HR, manager, and employee actors, consumed by a **React.js** + **TypeScript** dashboard.

TECHNICAL PROJECTS

VizTube – Video Platform Backend with AI-Powered RAG | [GitHub](#) | [Live API](#)

August 2025 - Present

TypeScript, Node.js, Express, PostgreSQL, pgvector, Prisma, Docker, AWS, FastAPI

- Engineered a complete **RAG** pipeline a decoupled **FastAPI microservice** streams audio to **Groq's whisper-large-v3**, embeds transcript chunks locally with **all-MiniLM-L6-v2**, and answers questions through **pgvector** cosine search in **PostgreSQL** and **OpenRouter LLMs** with cited sources.
- Runs live on a 1 GB-RAM **EC2 t3.micro** by design — **pgvector** inside **Postgres** (no separate vector DB), cloud **Whisper** transcription — 3 **Docker** containers shipped via **GitHub Actions CI/CD** behind **Nginx SSL** and **Cloudflare**.

Echolnbox – Anonymous Messaging & AI-Assisted Response Platform | [GitHub](#) | [Live Site](#)

June 2026 - July 2026

Next.js, TypeScript, PostgreSQL, Prisma, NextAuth, Vercel AI SDK, Groq

- Built a live anonymous-messaging platform with a custom **NextAuth** credentials flow — 6-digit expiring email verification via **Resend**, **bcrypt**-hashed passwords, and **Zod** validation on every input.
- Modeled a cascade-safe **PostgreSQL** schema through **Prisma**: **UUIDv7** user keys for faster index lookups, and account deletion that atomically removes all dependent messages.
- Groq Llama 3.3 via Vercel AI SDK with **Zod**-enforced structured suggestions and **Promise.all** parallel dashboard loads.

EDUCATION

- Bachelor of Computer Applications** | S.S. Jain Subodh PG College, Jaipur | 2024 – 2027
- Grade 12 – PCM – 90.2%** | KPS Udaan, Jaipur | 2024

CERTIFICATIONS

- Microsoft GitHub Foundations** | [Verify](#)
- Back End Development & APIs - FreeCodeCamp** | [Verify](#)
- Problem Solving (Intermediate) - HackerRank** | [Verify](#)

ACHIEVEMENTS

- Open-source contributor to [ed-donner/llm_engineering](#), RAG tool merged into main ([PR #3492](#), 900+ lines)
- Twice recommended by the **Indian Air Force** through its 5-day **SSB**, a multi-stage assessment of **leadership**, **psychology**, and **decision-making** under **pressure**.
- Solved 150+ **algorithmic** problems across [LeetCode](#), [Codeforces](#), and [HackerRank](#).
