Responsive Web Design

JavaScript Algorithms and Data Structures

Back End Development and APIs

Software Engineer Intern

Nishant Sharma

Software Engineer | TypeScript, Node.js, Next.js | AWS, PostgreSQL | Architecting Scalable Cloud Microservices, API Design, & AI-Assisted Workflows (FastAPI/LLMs) | Open to Full-Stack & Backend Roles

Greater Jaipur Area

Summary

I'm a backend-leaning full-stack developer who ships production-grade applications while still in my 2nd year of BCA.

' :

VizTube - Production Video Platform

- Deployed scalable video streaming backend to AWS serving real users
- Architected CI/CD pipeline reducing deployment time from 15 minutes to 90 seconds
- Optimized infrastructure to run on 1GB RAM EC2 instance, keeping costs under \$10/month
- Tech: Node.js, Express, PostgreSQL, Docker, GitHub Actions

JobTrack - Full-Stack Job Application Tracker

- Built end-to-end application with Next.js frontend and secure OAuth 2.0 authentication
- Implemented SSR for fast page loads and SEO optimization
- Deployed with automated CI/CD for zero-downtime updates
- Tech: Next.js, React, NeonDB, Docker, Nginx

:

Most students build tutorial projects. I deploy to production, handle real traffic, and optimize for actual constraints. I've:

- Migrated live database from MongoDB to PostgreSQL with zero downtime
- Configured AWS Security Groups, Nginx reverse proxy, and SSL/TLS encryption
- Built CI/CD pipelines that eliminate manual deployment errors

- Solved 300+ DSA problems focusing on time/space complexity optimization

:

Cleared SSB (Services Selection Board) assessments twice—a 5-day intensive evaluation that tests leadership, decision-making under pressure, and mental resilience. Only top 0.1% of 600,000+ candidates pass. This experience taught me to stay calm during production incidents and make quick technical decisions.

' :

Backend or full-stack role at a startup/product company where I can:

- Work with senior engineers and learn production best practices
- Own features end-to-end and see direct user impact
- Contribute from day 1 with my deployment and infrastructure experience

I'm available for full-time or internship roles (remote/hybrid preferred). Currently in 2nd year BCA, graduating June 2027, but can work full-time hours.

DM me if you're hiring backend developers who can ship production code.

Experience

Zytexa Technology llp

Full Stack Engineer

July 2026 - Present (2 months)

Jaipur

Pratham Software (PSI)

Software Engineer

March 2026 - June 2026 (4 months)

Jaipur

Built an end-to-end internal employee appraisal system using Java, Spring Boot, and MySQL, architecting a layered backend to handle multi-step review cycles and complex HR workflows. Designed and integrated RESTful APIs with a Next.js frontend, implementing Role-Based Access Control (RBAC) for administrators, managers, and employees.

Internshala

InternShala Student Partner (ISP)

July 2025 - September 2025 (3 months)

Selected as an Internshala Student Partner (ISP) for the July-August 2025 edition.

My responsibilities included:

- Promoting Internshala Trainings and internship opportunities within my college.
- Helping students upskill and get placed through awareness campaigns.
- Conducting social media marketing and brand communication for Internshala.
- Earning performance-based incentives through verified student enrollments.

Worked remotely while managing time alongside academics.

Future Interns

Full Stack Web Development Intern

July 2025 - August 2025 (2 months)

Participating in a Full Stack Web Development Internship under the Future Interns Fellowship Program. The internship focuses on skill development and practical application of concepts. Will complete tasks related to front-end and back-end development, including building a personal portfolio, developing a mini e-commerce storefront, and rebranding a website using AI tools. Upon successful completion, I will receive a Completion Certificate and a Letter of Recommendation.

Education

S.S. Jain Subodh PG (Autonomous) College, Jaipur

Bachelor of Computer Science & applications, Computer Science · (August 2024 - 2027)

Academind

NodeJS - The Complete Guide(MVC, REST APIs, GraphQL, Deno), Computer Programming, Specific Applications · (September 2025 - November 2025)

Khandal Public School

Physics, Chemistry, Mathematics, Information Practices · (April 2013 - June 2024)
